

# CONTENTS

<b>Introduction</b> .....	7
<b>Chapter 1. Pro-social behaviour under the neoclassical research program and the process of social change</b> .....	13
1.1. What is the neoclassical research program? .....	13
1.2. Social preferences, or how rational and self-optimizing agents reveal their social sentiment .....	16
1.3. The procedure specifying public choice and its criticism .....	22
1.4. Procedural and ecological rationality as the alternative to the optimization paradigm .....	26
1.5. The nature of social norms .....	27
1.6. The principles of reductionism and methodological individualism in the neoclassical research program .....	30
1.7. Social preferences or social norms? .....	32
1.8. Conclusion .....	33
<b>Chapter 2. Cultural environment, values, and well-being – a clustering analysis</b> .....	35
2.1. Cultural environment, formal institutions, and well-being .....	35
2.1.1. The nature and typology of culture. ....	35
2.1.2. On the idea of country-specific culture .....	38
2.1.2. Culture or informal institutions? .....	38
2.1.3. The links between cultural environment and the design of formal institutions .....	39
2.1.4. Institutional and cultural determinants of economic development .....	41
2.2. Research strategy description .....	44
2.3. Data processing method .....	45
2.3.1. Data pre-processing .....	45
2.3.2. Preliminary data analysis and clusterability assessment .....	47
2.3.3. Selecting and executing the appropriate algorithm & quality evaluation .....	64
2.4. Results and discussion .....	65
2.5. Conclusion .....	76
<b>Bibliography</b> .....	81

Appendices .....	89
Appendix 1. Country codes (World Values Survey, Wave 7) .....	89
Appendix 2. Variables used for assessing the cultural environment – WVS indices, individual responses (World Values Survey, Wave 7) .....	89
Appendix 3. Variables used for assessing the cultural environment – individual responses (World Values Survey, Wave 7) .....	91
Appendix 4. Variables used for assessing the perceived quality of the formal institutional environment – individual responses (World Values Survey, Wave 7) .....	97
Appendix 5. Variables used for assessing well-being – individual responses (World Values Survey, Wave 7) .....	99
Appendix 6. Eigenvalues visualization; the proportion of variance explained by each principal component .....	100
Appendix 7. Summary on the distance measures used in the study .....	104
Appendix 8. Cluster validity .....	105
Appendix 9. Herfindahl-Hirschman indices computed based on the clustering analysis output (WVS indices – Dataset 2) .....	112
Appendix 10. Herfindahl-Hirschman indices computed based on the clustering analysis output (variables describing the character of the cultural environment – Dataset 3) .....	113
